

# CONTENT1 VIRTUAL

Virtual Content Management

Content1 Virtual delivers a vibrant web presence to virtual attendees, provides speakers with a platform to share their content, and offers presenters the ability to record audio tracks for both presentations and posters that helps bring their content to life. The Content1 platform makes it easy to organize and deliver your event's content whether it is live or on-demand.

This intuitive and easy to navigate platform allows you to deliver live or on-demand presentations with ease. In addition to on-demand, content can be released on a schedule to closely simulate a face-to-face event.

# CONTENT1 VIRTUAL

Display meeting content virtually for your attendees to access long after the show ends. Our Content1 Virtual platform is an online content repository that helps keep presentations organized and readily available. Content1 works especially well for meetings or tradeshows with multiple presentations or exhibitions with a mix of live and on-demand delivery over several days.
